

# Mobility Scooters

## Visual Recognition Guide

### Class 2:

Class 2 scooters with three or four wheels will be accepted provided that they are no more than 600mm wide and 1000mm long this allows them to fit easily on-board a tram. They do not have headlights or indicators fitted and are limited to 4mph.

# Mobility Scooters

## Visual Recognition Guide

### Class 3:

These are larger than Class 2 and can travel at 6-8mph. They are not designed to be carried on board trams and should be refused. They are easy to spot as they are fitted with headlights, indicators and a manual brake.
